

PuPu

The PuPu can pump sludge of different consistencies into a tank away from the emptied pit.

It suits densely populated areas that are difficult to access by vacuum trucks.

Key advantages:

- Light weight, mobility, and used with any type of storage and transport;
- Plug and play
- Can pump thick sludge & level of debris with 4" hoses limiting risk of need for fishing.

Specifications

Pumping distance lay flat	0-100 meters depending on viscosity
Max suction depth	8 meters
Total head	20 meters
Diameter suction & delivery hoses	100 mm (4")
Length delivery hose	Delivered with 30 meters
Yield	1-7m ³ /h depending on viscosity
Operating pressure	- 0,8 to 2,5 bar
Warranty	1 year
